Rubin Observatory, formerly the Large Synoptic Survey Telescope (LSST), is an astronomical observatory in Coquimbo Region, Chile. The base facility is located about 100 kilometres (62 miles) away from the observatory by road, in La Serena. Its main task is to conduct an astronomical survey of the southern sky every few nights, creating a ten-year time-lapse record, termed the Legacy Survey of Space and Time (also abbreviated LSST) 07ebb05f10

Pan Am Flight 103 conspiracy theories Pan Am Flight 103 conspiracy theories suggest a number of possible explanations for the bombing of Pan Am Flight 103 on 21 December 1988. Some of the Pan Am Flight 103 conspiracy theories suggest a number of possible explanations for the bombing of Pan Am Flight 103 on 21 December 1988. Some of the theories preceded the official investigation by Scottish police and the FBI; others arose from different interpretation of evidence presented at Libyan agent Abdelbaset al-Megrahi's 2000–2001 trial; yet others have been developed independently by individuals and organisations outside the official investigation 07ebb05f10

AM Canum Venaticorum It is the type star of its class of variables, the AM Canum Venaticorum stars. The system consists of a white dwarf gaining matter via an accretion disk from a semi-degenerate or white dwarf companion. 95B, doi:10. Modern portfolio theory S2CID 12133839. doi:10. "Regional Economy Size and the Growth-Instability Frontier: Modern portfolio theory (MPT), or mean-variance analysis, is a mathematical framework for assembling a portfolio of assets such that the expected return is maximized for a given level of risk. Often, the historical variance and covariance of returns is used as a proxy for the forward-looking versions of these quantities. 01611. 2011. Chandra, Siddharth (2003). 1539-6924. 1111/j. x. The variance of return (or its transformation, the standard deviation) is used as a measure of risk, because it is tractable when assets are combined into portfolios. It is a formalization and extension of diversification in investing, the idea that owning different kinds of financial assets is less risky than owning only one type. Its key insight is that an asset's risk and return should not be assessed by itself, but by how it contributes to a portfolio's overall risk and return. PMID 21477097 07ebb05f10

Several types of astrophysical objects emit X-rays. They include galaxy clusters, black holes in active galactic nuclei (AGN), galactic objects such as supernova remnants, stars, and binary stars containing a white dwarf (cataclysmic variable stars and super soft X-ray sources), neutron star or black hole (X-ray binaries). Some Solar System bodies emit X-rays, the most notable being the Moon, although

most of the X-ray brightness of the Moon arises from reflected solar X-rays. 07ebb05f10 The observatory is named for Vera Rubin, an American astronomer who pioneered discoveries about galactic rotation rates. It is a joint initiative... 07ebb05f10
