

Essential Revision Notes For Mrcp

In this second edition, new questions have been added and existing material has been updated. Each question is accompanied by the correct answer, plus a page-long subject summary focusing on the specific topics likely to occur in the examination, including lists, mnemonics and bullet points. It contains 280 exam-based paediatric MCQs written by a team of subject specialists. The book's hybrid format bridges the gap between standard MCQ books and textbooks. This new format is a response to requests from exam candidates for longer teaching notes to counteract the need to refer to unnecessarily detailed textbooks 451fa1fcad

Divided into 30 sections, the book begins with discussion on common symptoms and presentations, then emergency presentations. Topics frequently encountered in examinations and key points are also highlighted. This textbook is an essential revision aid for trainees preparing for Membership of the Royal College of Physicians (MRCP) examinations. Key points Practical revision aid for trainees preparing for MRCP examinations Treatment protocols inline with current international guidelines Chapters highly illustrated with images and figures, and teaching notes to assist revision Highlights topics frequently encountered in examinations. The text concludes with chapters on geriatric medicine, genetics, epidemiology, clinical pharmacology, and ECG Interpretation. Treatment protocols are current and inline with the latest international guidelines. Each chapter is highly illustrated with images and figures, as well as teaching notes and easy-to-memorise lists to assist revision. The following sections provide in depth coverage of the diagnosis and

management of diseases and disorders in different body systems 451fa1fcad

A focus on how the basic sciences aid understanding of clinical practice is reinforced through key tables of differential diagnoses and pharmacology. The book also covers common examination errors and areas of misunderstanding to aid learning and help candidates avoid common pitfalls. Ten multiple choice questions at the end of each chapter consolidate learning and enable candidates to test their knowledge. Directly linked to the Royal College exam, the book follows the same systems-based approach as the syllabus for accurate and effective revision. Providing a clear explanation of the relevant medical science behind the individual medical specialties, Basic Science for Core Medical Training and the MRCP, is an indispensable part of a candidate's MRCP preparation. With full coverage of basic science for the medical specialties, the book features material on genetics, cellular, molecular and membrane biology, and biochemistry. Content is presented in an illustrated and easy-to-read format, ensuring that the basic science for each medical specialty is more approachable and accessible 451fa1fcad

Diagrams, pie charts, lists, illustrations and bullet points to aid learning. 25 Chapters covering all areas the MRCPCH syllabus in note format. Vital facts presented in an attractive user-friendly format. The definitive guide to revision for the MRCPCH examination. Concise presentation of information, with hints and tips 451fa1fcad

Designed for the MRCPsych Parts 1 and 2, this book is a helpful aid to candidates both before and after the exam. It covers basic science and clinical psychology and contains 30 chapters that follow the MRCPsych Parts 1 and 2 syllabuses 451fa1fcad

The content is based on the College of Emergency Medicine curriculum and provides candidates with a concise and complete guide for exam preparation. This book is a comprehensive revision guide for the MCEM Part B examination 451fa1fcad

Designed to help medical students through their exams. Built around the successful 'Essential Revision Notes for MRCP', this title focuses on what is essential learning for medical undergraduates and gives readers an 'all round' knowledge of medicine at this level 451fa1fcad

Includes 21 chapters that cover the syllabus for the MRCP 1 examination. This title features vital medical facts presented in note format to aid revision. It offers the reassurance of being up-to-date with the facts that matter. It contains key points presented in diagrams, illustrations, lists, tables and mnemonics to aid learning 451fa1fcad

Revision Notes for the Respiratory Medicine Specialty Certificate Examination 451fa1fcad

It clearly presents a wide variety of conditions in pictorial format, prompting recall with both visual and verbal mnemonics. Candidates must have the capacity to recall knowledge immediately - identifying possibilities, narrowing their findings and making a correct analysis. This book offers an innovative approach to revision for candidates. Each colour page offers a different condition and outlines only the details essential to diagnosis and treatment; a concise, refreshing approach to tackling the vast number of topics required. The MRCP PACES examination is a rigorous assessment of the ability to diagnose and treat a wide variety of conditions 451fa1fcad

This Book Is Different Every piece of educational theory available has been applied to make the learning experience as easy as possible: there are charts and tables, pictures and puzzles, limericks and poems, and even word searches - all complemented by a clear text. The results of their hard work. Annotation Students sitting the MRCP examination You can't pass the MRCP without knowing a good deal of medicine. The authors are well trained in medicine. They are also old hands at the MRCP - in some cases, enjoying it so much that they had several goes at all. But, there are two main problems with learning medicine: there is a vast amount to learn and much of it is terribly dull. Most texts designed to help aspiring students adhere to this philosophy of dullness. This book - the first structured course in not just what to learn, but how to learn it 451fa1fcad

1000+ high yield facts for the MRCP & Acute Medicine SCE \"Finally a resource that takes into consideration the time-pressures of long shifts & the sheer volume of knowledge that is required for these post-graduate exams\" - Dr. Unlike the vast majority of doctors who forget everything that was once learnt, you will be an exception by keeping your knowledge alive with this book. If you dip into it every so often, you'll find yourself developing as a better physician and providing a higher standard of care for your patients. For example you need MRCP Part 1 knowledge to pass MRCP Part 2. Through his revision, he faced 3 main challenges: Having little time and energy to revise Having to remember lots of information and quickly transition from one specialty to another The lack of dedicated resources to revise for the Acute Medicine SCE He wrote this book with the hope that it will help to address these challenges, and make revision manageable, enjoyable and ultimately successful. You don't even have to start at the beginning, you can start anywhere you like. It facilitates lifelong learning. g. This career choice means that he has had to do many exams. Muzzammil Ali is the founder of the Instagram page @mrcpfacts. It breaks up your revision into manageable chunks so that it does not feel daunting, tedious or impractical. However, unlike MCQ books, you don't have to annoyingly jump to the back to read

the answer. Many of them have clinical context to aid with learning through association e. In fact, if you spend just 1 minute immersed in its text, you will learn a thing or two. He wishes you all the best of luck in your exams. He is currently in the process of preparing for the FFICM exams in the near future. Joel George (Belgaum, India) The purpose of this book is crystal clear: to help you pass your exams through productive and efficient learning. you will quickly find that it brings to light information that you previously learnt but may have forgotten The facts are presented like a random generator to train your brain to quickly transition from one specialty to another. He is currently a registrar in the United Kingdom and is training in 2 different specialties: Acute Medicine & Intensive Care Medicine. About the author Dr. So far, he has completed the MRCP Part 1, Part 2, PACES and the Acute Medicine SCE, all in his first sitting. Each fact is in the form of a question to mirror the exams. Isabel Walters (Cheshire, UK) \"Your work really helped me with the MRCP Part 2 written exam & I'm happy to let you know that I managed to pass it on my first attempt\" - Dr. This book provides such scope and addresses an array of topics across the many syllabi. The answer is right under the question. g. Now although these exams are separate entities, they build upon each other with increasing relevance to clinical practice. it is easier to remember the management of a condition when you have seen or treated someone with it, rather than cramming the NICE guidelines Finally it's worth mentioning that this book is not just for those doing exams. You need MRCP Part 2 knowledge to pass PACES & the Acute Medicine SCE. His passion for education has translated in him being the Education Lead for the Intensive Care Unit at the Queen Elizabeth Hospital Birmingham, one of the largest tertiary hospitals in the UK. There are many benefits to this approach: By touching on a variety of different topics, it helps identify your deficiencies and builds upon your strengths It focuses on boosting your memory through strategies like spaced repetition and active recall e. It functions as a hybrid between an MCQ book and a textbook, presenting these topics as high yield facts 451fa1fcad

Effective use is made of student-friendly codes and bullet points for easy information retrieval, and popular features including textboxes, summary tables and clear and reproducible line diagrams have been retained and improved. If you know what is in this book then you will know enough to pass your finals. Complete Revision Notes for Medical and Surgical Finals does just that, presenting information in a stimulating way, which in turn enables easy recall. With pharmacology and pathology integrated throughout, this second edition covers all the key topics in: Medicine * Surgery * Paediatrics * Obstetrics & Gynaecology * Psychiatry * Orthopaedics * ENT * Urology * Ophthalmology * Oncology * Public Health. Structured by medical and surgical specialties, the contents are organised in a weighted fashion to reflect coverage in undergraduate curricula. Fully revised and updated with the latest medical information, and including new illustrations, Complete Revision Notes for Medical and Surgical Finals continues to provide an accessible and stimulating route to exam success. In the face of information overload when revising for your final exams, what you want is a revision book that provides all the key facts you need to know and none that you don't 451fa1fcad

This book is an invaluable resource with 400 self-assessment cases and data interpretation questions covering all aspects of internal medicine. It has great breadth of coverage, superb illustration, lively presentation, precise answers and detailed discussion 451fa1fcad

MRCP PART 1: 400 BOFs, Second Edition, offers a wealth of practice questions covering the full range of topics tested in the MRCP Part 1 exam. Recommended. With over 10% new practice material, including a new section on geriatric medicine in line with recent changes to the MRCP Part 1 syllabus, MRCP PART 1: 400 BOFs 2nd Edition remains the go to resource for all candidates taking the MRCP Part 1 written exam. Featuring fully descriptive answers and extensive referencing, this book provides the essential revision tool to maximise chances of exam success. It has a good range of topics pitched at a medium to hard difficulty level. 400 BOFs, reflecting the breadth of topics encountered in the actual

exam New section on geriatric medicine to reflect recent changes to the MRCP Part 1 exam syllabus Practical advice on how to approach revision and useful tips to improve exam technique First edition published March 2013 (9781907816444) Amazon reviews of the first edition: Very good book, really useful A valuable read during my preparation for MRCP part 1. Presented in a clear layout, chapters mirror the MRCP Part 1 syllabus to enable structured revision in each clinical specialty 451fa1fcad

The book provides the necessary information to tackle all these exam formats successfully, as well as to manage each topic competently should it arise in clinical practice. Examinations for undergraduate medical students and at postgraduate level can take a number of forms, including multiple choice and extended matching questions, single best answers, short notes, vivas and OSCEs. This book divides the medical and surgical curricula into over twenty key sections and concisely covers the relevant information for each, including definitions, aetiology, key clinical features, investigations, and management. Compact and user-friendly, this book is the ideal revision tool. Covering both medicine and surgery, this book is the essential revision companion for all medical students and a valuable source of knowledge for junior doctors at all stages of their training. It is useful both in the early preparatory phase of revision as well as for last minute cramming, and for use on the wards 451fa1fcad

Drawing on the authors' expertise, Medicine for MRCP is the ideal companion for the MRCP as well as a useful reference guide for practicing medical doctors. References to evidence-based protocols and directions to further reading allow for deeper understanding. Over 150 drawings and photos illustrate key principles and clinical topics making them easier to retain. Medicine for MRCP provides a comprehensive review of the material that you need to pass the MRCP Parts 1 and 2 written papers. Written by specialist contributors and educational experts, the content is carefully crafted to build your understanding for both papers. Candidates can review their progress via the 180 end-of chapter self-

assessment questions. To ensure effective revision, material is presented in short sections with bullet lists, tables, and boxes. The twenty-seven chapters mapped out to the RCP syllabus, cover all areas from molecular medicine and genetics, through to medical law and ethics. Each chapter begins with the basic science required for Part 1, before covering clinical medicine for Part 1, Part 2 and the PACES examinations 451fa1fcad

It focuses on the recurring themes which come up in the questions. Despite the changes to the teaching of the undergraduate in medicine and the integration of the basic sciences with clinical education, the junior doctor, faced with postgraduate examinations, is always going to be poorly prepared for those increasingly important subjects. Finally there is a chapter on statistics and epidemiology which is rarely covered in other texts, but is often included in the exam. A revision book intended primarily for candidates sitting their MRCP Part 1 examination and which covers all the essential basic sciences. This book presents the essential information in the form of lists, tables, diagrams and flow charts. The book also includes a chapter on clinical pharmacology (which alone accounts for up to 30% of the questions), looking at aspects of drug-induced disease and drug interactions 451fa1fcad

Following the super-success of their MRCP Part 2 volume, the authors adapt their special teaching skills to the needs of MRCP Part 1 and similar exams in internal medicine. It covers all areas of clinical medicine needed by ex. The book consists of 360 Best of 5' multiple choice questions (1,800 clinical decision) reflecting the latest exam format 451fa1fcad

The first revision text aimed specifically at the Knowledge-Based Assessment, Revision Notes for Cardiology exactly maps the core cardiology training curriculum to provide a clearly structured and easily accessible guide to this now-compulsory examination 451fa1fcad

Chapters are by subject areas following the MRCP Part 1 syllabus. This new edition is completely in the Best of Five format to be relevant to the current Part 1 examinations. The questions have excellent clinical scenarios and the answers have topic summaries to aid revision in the specific subject areas 451fa1fcad

The book contains short questions related to the FCEM curriculum along with succinct answers to allow candidates to test their knowledge. The FCEM Notebook: Revision Notes and Clinical Resource for Emergency Physicians is the essential guide to passing the Fellowship of the College of Emergency Medicine (FCEM) examination. Also included are current 451fa1fcad

Finding the time to revise effectively is one of the greatest challenges that modern MRCP candidates face. It stands apart from other MRCP revision resources in supplying both concise text and the essential lists needed to pass the Part 2 exam. This unique book by a recent successful candidate provides precisely what many have needed but been unable to find until now: the distilled essential knowledge required to pass the MRCP Part 2 exam. This book provides candidates with a concise and well-directed approach to fast and efficient revision, supplying comprehensive coverage of the MRCP syllabus and the key points of each topic 451fa1fcad

Offers an introduction covering the MRCS exam with particular reference to OSCEs; an overview of clinical skills in history taking and physical examination; chapters covering sections of the exam with popular cases in the OSCE format at the end of each chapter; and, a layout with colour images 451fa1fcad

It is divided into four sections: Section I introduces the reader to clinical neurology by summarising the basic aspects of a neurological consultation including history and examination; Section II covers neurological signs related to cranial

nerves, motor and sensory system and peripheral nerve lesions; Section III comprises the major and common diseases such as headache, epilepsy, stroke, Parkinson's disease and Multiple sclerosis; and Section IV addresses other main neurological problems. This book is the antidote to neurophobia. This has led to neurology's long-established reputation as a difficult subject. The scope of this book is limited to only the most fundamental principles and omits all superfluous detail - ideal for medical students needing a concise introduction to neurology and an overview for revision. Neurological disorders account for 10% of consultations in primary care and 20% of acute hospital admissions, yet there is good evidence that 'neurophobia' is common among medical students lost in unnecessary detail 451fa1fcad

MRCP SCE in Respiratory Medicine: 300 SBAs is a unique resource that offers a wealth of practice questions for candidates preparing for the Specialty Certificate Exam in Respiratory Medicine. Featuring questions written in line with relevant British and international guidelines this book is an indispensable revision aid designed to maximise the chances of exam success. Chapters in the book correspond to the topics in the syllabus, while the number of questions in each chapter is weighted in accordance with the college's exam blueprint 451fa1fcad

Presented as a unique three-volume set, each volume features 375 high-quality practice questions on each of the medical systems and specialties in alphabetical order. Offers a comprehensive and trustworthy solution to anybody wishing to sit, pass, and excel at the Membership of the Royal College of Physicians Part 1 examination 451fa1fcad

Written by authors who remember their own PACES examination, their experience in learning and teaching PACES is condensed to provide exactly what you need to know to pass. Featuring a 'case study' format that matches the style of the exam, it includes all the essential information - perfect for on-the-ward revision and study. www.wileymedicalstudent.com. With its informal style, Cases for PACES is also ideal for self-directed learning in

groups, and will help you hone your clinical skills and boost your confidence in the run-up to the examination. The new edition of this very popular study guide has been completely updated, and now includes scenarios for Station 5, introduced in October 2009. Cases for PACES provides a concise study aid to Part II of the MRCP examination; the Practical Assessment of Clinical Examination Skills or PACES. com/a. For more titles to help you prepare for MRCP examinations go to <http://www.451fa1fcad>

This title also includes comprehensive answers section that features explanations that enable the reader to develop the knowledge and confidence to pass the exam. Includes 16 subject-based chapters - covering the Royal College of Physicians' curriculum for Part 1 of the MRCP 1 examination 451fa1fcad

Comprising of best of five multiple choice questions, detailed answers and separate revision notes, Revision Notes for the Respiratory Medicine Specialty Certificate Examination is the only book you need to prepare for this important examination 451fa1fcad

Provides the most up-to-date material, matching the MRCS syllabus, to aid preparation for the MRCS A examinations. The book covers every major subject in the MRCS syllabus; works systematically through every general surgical topic likely to appear in the exam; highlights important principles of Surgery; contains important lists and vital points; is clearly laid out with illustrations to aid understanding 451fa1fcad

Featuring a wealth of practice questions, MRCP PART 2: 450 BOFs allows trainees to test themselves on everything they need to know to pass the MRCP Part 2 written exam 451fa1fcad

Suitable for candidates preparing for the MRCPCH exam, this title includes 24 specialty-based chapters that provide concise information in an accessible format 451fa1fcad

It is an essential study aid for all those preparing for postgraduate examinations in psychiatry and a superb reference for practising psychiatrists. Structured to follow the entire MRCPsych exam syllabus, the book covers the following key areas, along with the CACS examination: Paper 1: General and adult psychiatric disorder History and mental state examination Cognitive assessment Neurology and psychology for psychiatrists Psychopathology History of psychiatry and psychiatric ethics Paper 2: Psychopharmacology Neurobiology for psychiatrists Psychiatric genetics Epidemiology Advanced psychological processes and treatments Paper 3: Critical appraisal Learning disability Child and adolescent psychiatry Old age psychiatry Forensic psychiatry Consultation liaison psychiatry Neuropsychiatry Psychosexual medicine Fully updated with recent references and many additional figures, this third edition features a wealth of new material (including NICE guidelines) and updates the DSM-IV-TR criteria to the new DSM-5. Revision Notes in Psychiatry, Third Edition continues to provide a clear and contemporary summary of clinical psychiatry and the scientific fundamentals of the discipline. Designed to meet the needs of today's candidates, Revision Notes in Psychiatry, Third Edition continues to provide a source of trusted expert information to ensure examination success for all those taking higher examinations in psychiatry 451fa1fcad

This concise revision text brings together the fundamentals of the basic sciences required for Obstetrics and Gynaecology trainees to pass the MRCOG Part 1 exam. A note-style format and over 100 illustrations make this the ideal revision guide to passing the exam 451fa1fcad

In this second edition the immunology and genetics chapters have been updated along with a section on molecular medicine. This book was written in response to the need for a revision guide of the core basic sciences, namely genetics, microbiology, immunology, anatomy, physiology, biochemistry, statistics, and epidemiology. Recognition of the importance of the basic sciences in medicine has led to a growing emphasis on such questions in both the MRCP part 1 and 2 examinations 451fa1fcad

Offers a range of sample comparative journal extracts enabling Foundation Year doctors and MRCP and MRCPsych candidates to practise their critical appraisal skills. This title includes extracts that cover the whole spectrum of critical appraisal, together with exercises for the reader to work through independently to improve their technique 451fa1fcad

Candidates taking the MRCP 1 examination will find this title essential reading. It provides invaluable guidance at practising 'Best of Five' format questions. The questions have up-to-the-minute clinical scenarios encountered in everyday hospital practice. Contains 300 brand new 'Best of Five' questions with expanded answers for focused revision 451fa1fcad

It includes all of the most relevant clinical information for the PACES exam supplemented by tips supplied by the highly experienced chapter authors. The main aim of the book is to consolidate candidates' theoretical knowledge and help them apply it to the clinical examination scenario. This book provides an easily portable yet comprehensive guide to the PACES examination. In addition the book forms an excellent pocket reference for trainees in acute medicine, accident and emergency medicine, anaesthetics and critical care and general practice 451fa1fcad
