A Practical Guide For Museums

Gary King (talk · scripts) 19:35, 2 July 2010 (UTC) 5475fc258e Following the community discussion on portals which ended in May 2018 with "a strong consensus against deleting or even deprecating portals at this time", there was initially a surge in new portals resulting from mass creation using new automated tools. This wave of enthusiasm which saw a huge expansion of several hundred semi-automated portals was then countered by mass deletion, for example here and here. Having more or less restored the status quo, however, portals continue to be deleted at a rate - currently about 100 per month - that means within a year they will cease to exist or there will be so few that it will be pointless maintaining portal space. I personally am very much in favour of quality portals with several purposes: as navigation aids, as a showcase for broad topics, as an instant overview of a topic and as a tool for project editors to expand and improve coverage. However, it is now clear that the community is either unable or unwilling to defend its consensus - partly because there is a small band of determined editors working their way through all the... 5475fc258e A 2017 report by the Federal Road Research Institute reported that in 2015, 70.4% of the Autobahn network had only the advisory speed limit, 6.2% had temporary speed limits due to weather or traffic conditions, and 23.4% had... 5475fc258e Technology reportVisualEditor and MediaWiki updates 5475fc258e Wikipedia:Village pump (technical)/Archive 78 control the width of each column; that whole table uses %ages for widths and so any unmanaged column width can be out of proportion. Autobahn The official term is Bundesautobahn (abbreviated BAB), which translates as 'federal motorway'. Autobahnen, pronounced [ʔaʔtoʔbaʔnʔn]) is the federal controlled-access highway system in Germany. Unmanaged rest areas are basically The Autobahn (IPA: [ʔaʔtoʔbaʔn] ; German pl. There is a distinction between 'managed' and 'unmanaged' rest areas. (German: bewirtschaftet / unbewirtschaftet). designated areas. 2015-04-29 5475fc258e Much of the system has no speed limit for some classes of vehicles. However, limits are posted and enforced in areas that are urbanised, substandard, prone to collisions, or under construction. On speed-unrestricted stretches, an advisory speed limit (Richtgeschwindigkeit) of 130 kilometres per hour (81 mph) applies. While driving faster is not illegal in the absence of a speed limit, it can cause an increased liability in the case of a collision (which mandatory auto insurance has to cover); courts have ruled that an "ideal driver" who is exempt from absolute liability for "inevitable" tort under the law would not exceed the advisory speed limit. 5475fc258e In January, the jury announced it had selected Esino Lario as conference host. The decision is subject to approval by the WMF Board, although this fact is difficult to discern from the jury's timeline, which has it that "by the end of 2014 ... jury decision made; announcement of host city to bidders and public", and of the statement at the time by Ellie Young that: "On the recommendation of the Wikimania 2016 selection Jury Committee, we have accepted the proposal from the Esino Lario Italy team." No jury decision has ever been overturned by the Board, which Young told the Signpost is due to examine the recommendation in May, after her site visit that month. Nevertheless, she did express some potential concerns with the bid, which will be directly funded by the WMF with some US\$350,000—a basic grant comparable to the 2010 and 2012 Wikimanias. Young has refused to issue further comments either to the Signpost or concerned editors, instead requesting patience for the WMF to complete its site visits. 5475fc258e The town hall in Esino Lario, one of the locations for proceedings of the 2016 Wikimania 5475fc258e 5475fc258e Wikipedia:Village pump (proposals)/Archive 162 Tools and processes for managing the namespace continue to be developed == Proposal to delete Portal space ==. believe that portals still serve a useful function on Wikipedia, and should be retained 5475fc258e

Each Wikimania site is selected by a jury, a temporary group that assembles each year to review bids and recommend a host to the WMF Board. The jury is composed of six volunteer editors and WMF conference coordinator Ellie Young, who is a voting member. Of the volunteers, four are from Europe, one is from South America, and one is from Australia. Of six original bids for Wikimania 2016, four were disqualified by the jury, leaving just Manila, the capital city of the Philippines, and Esino Lario. 5475fc258e Wikipedia:Articles for deletion/Log/2007 December 18 Noroton (talk) 01:12, 20 December 2007 (UTC) Keep for reasons above === References ===. In the past, the conference has not been without controversy, highlighted by the repeated failure of the Hong Kong organisers of the 2013 event to produce a financial statement, raising still-unresolved questions of financial probity. This failure occurred despite an upbeat announcement by the volunteer jury 18 months before that they had selected Hong Kong's bid over four other proposals. Although

the 2016 jury's decision initially received accolades in the community and from several WMF staffers, there were glimmers of doubt almost immediately on the Wikimedia mailing list ("sounds just a little bit crazy"; "Northern Italian village of 775 people for a conference of 1,000. ... So where are people gonna sleep?") 5475fc258e Esino Lario—a mountainous village of some 750 people in northern Italy—was selected to host Wikimania 2016. However, volunteers and others have since brought up a host of concerns that raise serious questions about the town's suitability for hosting such a large conference. 5475fc258e LinkedIn 5475fc258e Facebook 5475fc258e Featured content Another day, another dollar 5475fc258e
