Popping or crunching noises b890a74bac The knee joint consists of an articulation between four bones: the femur, tibia, fibula and patella. There are four compartments to the knee. These are the medial and lateral tibiofemoral compartments, the patellofemoral compartment and the superior tibiofibular joint. The components of each of these compartments can experience repetitive strain, injury or disease. b890a74bac Tibial plateau fracture This could involve the medial, lateral, central, or bicondylar (medial and lateral). Data A tibial plateau fracture is a break of the upper part of the tibia (shinbone) that

involves the knee joint. People are generally unable to walk. Complication may include injury to the artery or nerve, arthritis, and compartment syndrome. Symptoms include pain, swelling, and a decreased ability to move the knee. Wheelless III. Retrieved 13 October 2018. Wheelless' Textbook of Orthopaedics. Clifford R.
