# A Handbook For Translator Trainers Translation Practices Explained

This book provides a detailed introduction and guide to researching translator and interpreter education. Providing an overview of the main research topics, trends and methods, the book covers the following six areas: training effectiveness, learning and teaching practices, assessment, translation and interpreting processes, translated and interpreted texts, and professionals' experiences and roles. As the first book to provide a comprehensive overview of translator and interpreter education research, it has important implications to developing its areas at the theoretical and practical levels. The book focuses on explaining the issues and topics researched in each area, and showing how they have been researched. In addition, it offers an invaluable guide for those interested in researching translator and interpreter education areas, and in educating translators and interpreters e7b5fa8a18

By definition, translators are intercultural mediators. This book explores some of the most important current approaches in defining intercultural competence for translators. At the same time, it provides real-life examples of different approaches in operationalizing intercultural competence and teaching it in a translator-training context. This book was originally published as a special issue of The Interpreter and Translator Trainer. Written for a global audience, the book provides an informative overview of the field as well as practical examples from different academic and cultural contexts e7b5fa8a18

Roderick Jones adopts a very practical approach to both consecutive and simultaneous interpreting, providing detailed illustrations of note-taking, reformulation, the 'salami' technique, simplification, generalization, anticipation, and so on, including numerous tricks-of-the-trade such as how to handle difficult speakers and how to interpret untranslatable jokes. Modifications with respect to the first edition include an updated reading list, an index, and guideline tasks for training sessions. The popularity of the book since its first appearance in 1998 suggests that little else needs to be changed. Jerome had no separate series for books on practice as such. Although primarily written as a practitioner's explanation rather than a theorist's speculation, the book includes notes on concepts such as units of meaning, translation units and discourse structure, as well as stances on more polemical issues such as the use of omission and the ethics of interpreting mistakes. Numerous examples are offered at every stage, all in English

or 'foreignized' English. In all, it fills a major gap in English-language publications on interpreting, providing an introduction for beginners, a down-to-earth guide for students, and a handy compendium for teachers. Happily, it has now found its rightful place in the Practices series. The book concludes with a comment on the pleasure of conference interpreting, as well as a glossary and suggested further readings. The first edition of this book was published in the series Translation Theories explained, at a time when St e7b5fa8a18

The volume is intended as a starting point to encourage educators to rethink their approach to translation pedagogy by envisaging tools and practices that can contribute to preparing students to become professional translators of ELF and reflective practitioners who are aware of the centrality of translation in the digital age. The study of English as a Lingua Franca (ELF) has grown considerably in the last decades, and a wide number of issues related to this field have been addressed through a variety of lenses. Adopting different perspectives and positions, the articles in this special issue of The Interpreter and Translator Trainer all demonstrate that ELF poses many challenges to the teaching of translation and that, while there are no simple and ready-made solutions, such challenges need to be taken on board to fill the current gap between translation pedagogy and translation practice. These range from the changes occurring in spoken English, to the much-debated notion of the native-speaker; from the threat that English represents for minority languages, to the metadiscourse(s) contributing to the myth of English as a language equally accessible to speakers of all nationalities e7b5fa8a18

This wider remit of Situated Learning encompasses previously underrepresented contextual factors pertaining to translation traditions, historical trends, community beliefs and customs, socio-economic constraints, market conditions, institutional practices, budgetary issues,

or resource availability. The pedagogical considerations of these key aspects make this book particularly useful for both novice and seasoned teachers of translation and interpreting with an interest in informed practical advice on how to implement the principles of Situated Learning in collaborative teaching and learning environments that seek to promote translators' and/or interpreters' professional competence. real-world, or semi-authentic professional settings. Ultimately, Situated Learning seeks to enhance learners' capacity to think and act like professionals. This book was originally published as a special issue of The Interpreter and Translator Trainer. It presents an understanding of Situated Learning that goes beyond previous interpretations of this notion, traditionally dominated by the discussion of pedagogical practices in authentic, i. Situated Learning is generally understood as a context-dependent approach to translator and interpreter training under which learners are exposed to real-life and/or highly simulated collaborative work environments and tasks, both inside and outside the classroom. e. This book sets out to gauge the extent to which different factors influence the implementation of Situated Learning models in various teaching and learning contexts e7b5fa8a18

The book presents a range of theoretical and practical approaches to the teaching of the twin professions of interpreting and translating, covering a variety of language pairs. The experience of the authors, who are all actively engaged in training interpreters and translators, demonstrates the innovative, practical and reflective approaches which are proving invaluable in the formation of the next generation of professional translators and interpreters. The articles show very clearly the strengths and needs, the potential and vision of interpreter and translator training as it exists in countries around the world. While many of them are being trained in universities, they are being prepared for a life in the real world of business and politics through the use of authentic texts and tools and up-to-date methodology. All aspects of the training process are addressed - from detailed word-level processing to student concerns with their careers, and from the setting of examinations to the standardisation of marking e7b5fa8a18

The book is divided into three sections, with the first outlining the competences required of institutional translators, the second exploring

training practices at the university level and \"on the job\. The volume’s focus on training brings a unique perspective to existing research on institutional translation, which has tended to single out such themes as agency, professionalism, and quality. This collection surveys the translator training landscape in international organizations on a global scale, offering a state-of-the-art view on institutional translator training research and practical takeaways for stakeholders e7b5fa8a18

Beginning with the paradox that characterizes the history of translation studies in the last half century - that more and more parameters of translation have been defined, but less and less closure achieved - the first half of Enlarging Translation, Empowering Translators calls for radical inclusionary approaches to translation, including a greater internationalization of the field. The book investigates the implications of the expanding but open definition of translation, with a chapter on research methods charting future approaches to translation studies. Revamped ideological frameworks for translation, new paradigms for the translation of culture, and new ways of incorporating contemporary views of meaning into translation follow from the expanded conceptualization of translation, and they serve as a platform for empowering translators and promoting activist translation practices. Addressed to translation theorists, teachers, and practising translators alike, this latest contribution from one of the leading theorists in the field sets new directions for translation studies. In the second half of the book, these enlarged views of translation are linked to the empowerment and agency of the translator e7b5fa8a18

Indirect Translation Explained is the first comprehensive, user-friendly book on the practice of translating indirectly in today’s world. Featuring theoretical considerations, tasks for hands-on practice, suggestions for further discussion and diverse, real-world examples, this is the essential textbook for all students and autodidacts learning how to translate via a third language. Written by key specialists in this area of research and drawing on many years of translation teaching and practice, this process-focused textbook covers a range of languages, geographical settings and types of translation, including audiovisual, literary, news, and scientific-technical translation, as well as localization and interpreting. Since this topic addresses the concerns and practices of

both more peripheral and more dominant languages, this textbook is usable by all, regardless of the language combinations they work with. com. Additional resources are available on the Routledge Translation Studies Portal: http://routledgetranslationstudiesportal. Unlike previous scholarly approaches, which have traditionally focused on translating from the original, this textbook offers practical advice on how to efficiently translate from an already translated text and for the specific purpose of further translation e7b5fa8a18

It will serve as a valuable resource for academic researchers, educators, and assessors in translation and interpreting studies, as well as practitioners and students of translation and interpreting studies. This book is the first and only dictionary on education and assessment in the context of translator and interpreter training. It contains key terms defined and discussed with a broad focus, and arranged alphabetically. It offers the reader in-depth and up-to-date knowledge regarding key issues of the education and assessment of translators and interpreters, including how best to train translators and interpreters and how best to assess their performance in pedagogical settings e7b5fa8a18

This text offers practical guidance to sound training practices in different contexts. It will be of use to language teachers new to translation, to professional translators new to teaching or training, to graduates in translation embarking on academic careers in translation studies, & to experienced trainers to train new trainers e7b5fa8a18

The volume charts the evolution of TC in line with related findings in empirical product- and process-oriented research. The second section of the book investigates these themes at work in the design, conduct, and results of an award-winning longitudinal research project which analysed the acquisition and development of TC in a sample group of translation trainees and professional translators. This book offers a systematic and comprehensive account of translation competence (TC), reflecting on its different models and conceptualisations throughout its development and outlining future directions for both theory and practice. In critically examining the different models of translation competence, Quinci explores a wide range of connected issues of ongoing debate within Translation Studies, including translation quality, the revision

process, and translator self-assessment. The volume builds on the outcomes of this project to offer practical activities for translator education, informed by theory and empirical research, toward encouraging continued reflection and new directions for translation competence research and practice. This book will be of interest to scholars in Translation Studies, as well as translation trainees and active translation professionals e7b5fa8a18

Leading theorists respond to the state of Translation Studies today, particularly the epistemological dilemma between theories that are empirically oriented and those that are inspired by developments in Cultural Studies. Originating at an international forum held at the University of Vic (Spain), the twelve essays collected here attest to important changes in translation practice and the assumptions which underpin them. The contributors all assume that translation, whether written or oral, does not occupy a neutral space. Among the topics considered are: how to use translation technology in the classroom, how to construct a syllabus for a course in audiovisual translating or in translation theory, and how to develop guidelines for a program for community interpreters or conference interpreters. It is a cross-cultural exchange that produces far-reaching social effects. Their essays significantly advance the theoretical and practical understanding of translation along these lines. But the volume is also practical. Experienced instructors survey existing pedagogies at translator/interpreter training programs and explore new techniques that address the technological and global challenges of the new millennium e7b5fa8a18

The strategies offered are based on the pragmatic and semantic analysis of texts from a functional point of view, and they include such practical matters as the use of dictionaries and the evaluation of translations and error analysis. The book is intended for teachers in translator-training institutions, but it can also be used by students for self-training. The creative and successful processes observed can be used directly for teaching purposes, while the unsuccessful ones can serve to find out where remedial training is needed. The book then goes on to discuss methods for improving a translator's competence. This book begins by investigating, through the use of think-aloud protocols,

the mental processes of students when they translate e7b5fa8a18

Colina focuses on the key concepts that beginning students of translation, practising translators, language students and language professionals need to understand. In addition, examples, figures and text extracts from a wide variety of world languages contextualise chapter material and produce a lively and accessible narrative. Clear and concise, this textbook provides a non-technical introduction to the basic and central concepts of translation theory and practice, including translation briefs, parallel texts and textual functions, cohesion and coherence, and old and new information. Suitable for non-specialists with no prior experience of translation, it will also be of interest to practising translators, language students and language industry professionals who wish to gain a wider and up-to-date understanding of translation. Numerous exercises (discussion, group and individual) at the end of each chapter and 'Practice' activities throughout each chapter allow students to self-assess their practical understanding of chapter topics e7b5fa8a18

taylorfrancis. The handbook also examines examples of pedagogies that integrate translation in the curriculum, the teaching method’s approach, design and procedure as well as assessment. The Routledge Handbook of Translation and Education will present the state of the art of the place and role of translation in educational contexts worldwide. It lays a sound foundation for the future interdisciplinary cooperation between Translation Studies and Educational Linguistics. Chapters 4, 25, and 26 of this book are freely available as downloadable Open Access PDFs at http://www. Each contribution provides an overview of the historical background to a given educational setting. Focusing on current research approaches and empirical findings, this volume outlines the development of pedagogical approaches, methods, assessment and curriculum design. com under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4. 0 license. Based on a multilingual and applied-oriented approach, the handbook is essential reading for postgraduate students, researchers and advanced undergraduate students of Translation Studies, and educationalists and educators in the 21st century post-global era. By adopting a transdisciplinary perspective, the handbook will bring

together the various fields of scholarly enquiry and practice that make a valuable contribution to enlarging the notion of translation and diversifying its uses in education e7b5fa8a18

Given the very wide variety of backgrounds translator trainers come from, the text aims to be equally of use to language teachers new to translation, to professional translators new to teaching or training, to recent graduates in translation intending to embark on academic careers in translation studies, and to more experienced trainers wishing to reflect on their activity or to train new trainers. Chapters contain exercises and activities designed to promote reflection on practice and to help trainers to develop their teaching skills, as well as their own course material. A systematic approach to curriculum and syllabus design is adopted, guiding readers from the writing of learning outcomes or objectives through to the design of teaching and learning activities, to the assessment of learning and course evaluation, all this applied throughout in detail to the field of translation. For that reason, no specific prior knowledge or experience of training is taken for granted. The community of translator trainers is growing constantly, as new courses are set up in diverse contexts throughout the world. These activities are suitable both for self-learners and for groups on trainer training and staff development courses. After a brief overview of current approaches to translator training, this book offers practical guidance to sound training practices in different contexts e7b5fa8a18

Its core goals are to improve the quality of student learning about ethics, develop confidence in ethical decision-making, and enhance a commitment to ethics beyond the programme of study. Including chapters on the ethical implications of using technology and the ethics involved in assessment and feedback, equal weight is given to both translation and interpreting. This book provides university-level educators in translation and interpreting with a practical set of resources to support a pedagogically engaged approach to ethics. The book promotes an integrated approach to ethics teaching. Routledge Guides to Teaching Translation and Interpreting is a series of practical guides to key areas of translation and interpreting for instructors, lecturers, and course designers. The approach includes emphasis on problems of practice, or “ethical dilemmas”, using real-world examples, but

simultaneously encompasses a more wide-ranging set of ethical questions for both educators and their students. Providing a key point of reference for information on different theories of ethics, insight into pedagogical practices around the globe, and practical guidance on resource development for classroom use and extension activities for independent learning, this is an essential text for all instructors and lecturers teaching ethics in translation and interpreting studies. Encompassing critical engagement and reflection, the resources have been designed to be easily developed and adapted to specific teaching contexts e7b5fa8a18

The text can be used as a course book for students in face-to-face learning, but also in distance and mixed learning situations. Medical Translation Step by Step provides a pedagogical approach to medical translation based on learner and learning-centred teaching tasks, revolving around interaction: pair and group work to carry out the tasks and exercises to practice the points covered. Statistics on the translation market consistently identify medicine as a major thematic area as far as volume or translation is concerned. These include work on declarative and operative knowledge of both translation and medical texts and favour an approach that takes into account both the process and product of translations. It will also be useful for teachers as a resource book, or a core book to be complemented with other materials. Vicent Montalt and Maria Gonzalez Davis, both experienced translator trainers at Spanish universities, explain the basics of medical translation and ways of teaching and learning how to translate medical texts. It is positively focused in that it does not insist on error analysis, but rather on ways of writing good translations and empowering both students and teachers. Starting from a broad communication framework, the book follows a top-down approach to medical translation: communication ? genres ? texts ? terms and other units of specialized knowledge e7b5fa8a18

This volume deals with the theory and practice of incorporating authentic experiential work into curricula for the education of professional translators and interpreters. Matters of educational philosophy, curriculum design as well as instructional design are dealt with, and the wide range of focal points and perspectives of the various

authors provides a multi-facetted view of authentic project work that has so far been lacking in translation pedagogy literature. The contributions deal with a wide variety of topics in this domain, extending from the foundations of experiential learning in pedagogical epistemology to discussions of exemplary experiments with the use of authentic project work at leading translator and interpreter education institutions in Germany, Spain and Switzerland e7b5fa8a18

Language and the Law: Global Perspectives in Forensic Linguistics from Africa and beyond is the third volume in a series of books designed to contribute and respond to growing interest in forensic linguistics or language and the law on the African continent. Drawing mostly on contexts where traditional African laws and Western laws are practised side-by-side, and where there are discontinuities between local knowledge systems, belief systems and language practices on the one hand, and official languages of law discourse, conceptualisation and jurisprudence documentation on the other, the chapters in this volume problematise, among other issues, the mediation practices (or lack thereof) of language and legal processes, discourse strategies and complexities in (mis)interpretations in second language court contexts and the miscarriage of justice that these may entail e7b5fa8a18

But many diverse, yet interrelated contextual factors also play an important part in the implementation of a successful translation program. The aim of this coursebook is to explore, in varying degrees of detail, a wide range of these crucial situational variables and potential influences, using a multidisciplinary approach to the task. These contextual factors provide a broader frame of reference for analyzing, interpreting and communicating the original Scriptures in a completely new, contemporary setting of transmission and reception. Thus, in order to expand and enrich the field of vision, a progressive study of this complex process of intercultural, interlinguistic communication is carried out according to a set of overlapping sociocultural, organizational and situational cognitive orientations. The three dimensions are then applied in a practical way to explore the dramatic \"throne-room\" vision of the Apostle John (Revelation 4-5) with reference to both the original Greek text and also a modern dynamic translation in Chewa, a southeastern Bantu language of Africa. A variety of exercises and assignments to

stimulate critical and creative reflection as well as to illustrate the theoretical development of Contextual Frames of Reference is provided every step of the way. An Appendix offers a foundational essay by Professor Lourens de Vries on the subject of primary orality and the influence of this vital factor in the crosscultural communication of the Bible. Not only is translation per se discussed, but the teaching and evaluation of translated texts and versions are also considered from several points of view in the final three chapters. Bible translation theory and practice rightly tend to focus on the actual text of Scripture e7b5fa8a18

With an introduction written by Juanjo Arevalillo, managing director of Hermes Traducciones and former vice-president of the European Union of Associations of Translation Companies, the book creates a fresh momentum for researchers, academics, professionals and trainees to be engaged in a constructive dialogue. Training institutions offering specialized translation and interpreting programs need to keep up with the rapid development of digitalization and the increasingly sophisticated requirements of the language industry. This book addresses digital trends and employability in the market from the aspect of training: how have the latest digital trends shaped the language industry, and what competencies will translators, interpreters and T/I trainers need so as to meet current market requirements. Four major subjects of high relevance are discussed in 12 chapters: (1) collaborative partnership in the field of fit-for-market practices with a focus on e-learning materials; (2) competence development in translator and interpreter training; (3) the implications of neural machine translation and the increasing significance of post-editing practices, as well as (4) the role of new technologies and new methods in the work and training of interpreters and translators e7b5fa8a18

\"This book presents an interdisciplinary approach to educational contexts across cultures for the study of verbal and written linguistics in order to broaden students' communicative and problem solving abilities\"-- e7b5fa8a18

The field of forensic linguistics is a niche area that has not enjoyed much participation from the African continent. The theme of language

and the law in this book is one that straddles two important aspects of the legal history of South Africa in particular, and how it has impacted on the country. The contributions by authors in this book tell the story of many African citizens, and those hailing from beyond our borders, who straddle the challenges of linguistic and legal pluralism in courtrooms across their respective countries. It is our hope that the contributions made in this book will assist in ensuring human rights become a reality for global citizens where indigenous voices have not been heard; and that these citizens will be free to give their testimonies in a language of their choice, and that they may be heard and understood. The International Year of Indigenous Languages. is opportune, not only for the launch of this book, but for what its research content tells us of the strides taken in ensuring access to justice for all citizens of the world in a language they understand. s legal and education systems. e. This book focuses on new perspectives on assessment in translator and interpreting education and suggests that assessment is not only a measure of learning (i. It includes empirical studies which examine competence-based assessment and quality in translation and interpreting education both at undergraduate and postgraduate level. assessment ‘for’ learning and assessment ‘as’ learning). assessment ‘of’ learning) but also part of the learning process (i. The findings of this book lend support to existing theoretical frameworks and inform course planning and design in translation education. To this end, the book explores the current and changing practices of the role and nature of assessment not only in terms of the products but also the processes of translation. This includes studies and proposals on formative and summative assessment in a wide range of educational contexts, as well as contributions about relatively unexplored research areas such as quality assurance and assessment in subtitling for the D/deaf and the hard of hearing, and how closely translation programmes fit the reality of professional practice. This book was originally published as a special issue of The Interpreter and Translator Trainer. As such, it will be a valuable resource for translation educators, trainers and researchers, translation and interpreting practitioners and associated professionals. e e7b5fa8a18

The numerous examples and discussions of specific terms make the book useful both as a manual in the translation class and as an invaluable reference work for students, teachers, self-learners and professional translators. Individual chapters deal with legal English as a linguistic system, special concepts in the translation of legal English, the genres of legal translation, and offer a series of practical problems together with discussions of proposed solutions, as well as insight into the pragmatic ways translators go about finding solutions. Focusing on the problems of translating English legal language, Alcaraz and Hughes offer a wide-ranging view of one of the most demanding and vital areas of contemporary translation practice e7b5fa8a18

This book features invited contributions based on the presentations at the First World Interpreter and Translator Training Association (WITTA) Congress, held in Guangzhou, China, in November 2016. Given its scope, the book appeals to translation scholars and practitioners, education policymakers, and language and education service providers. Covering a wide range of topics in translation education, it includes papers on the latest developments in the field, theoretical discussions, and the practical implementation of translation courses and programs e7b5fa8a18

* includes a wide variety of lively activities and exercises to facilitate the learning of both theory and practice * includes a detailed Teachers guide - contains suggestions for discussion and activities and hints for the teaching of translation. Douglas Robinson presents an innovative approach to translation by integrating translation theory and the practical skills required by the working translator. Becoming a Translator has been specifically designed for introductory undergraduate courses in the theory and practice of translation. The book provides the type of practical information and advice that novice translators need: * how to translate faster and more accurately * how to deal with arising problems and stress * how the market works. It will also be of interest to professional translators and students of translation and language e7b5fa8a18

As a result, the notions of revision and interpersonal competences have gained great importance with international projects recognizing them as

high priorities. The development of translation memories and machine translation have led to new quality assurance practices where translators have found themselves checking not only human translation but also machine translation outputs. It also informs the design of new ways of evaluating students as well as suggesting criteria for professional quality control. Quality Assurance and Assessment Practices in Translation and Interpreting is a critical scholarly resource that serves as a guide to overcoming the challenge of how translation and interpreting results should be observed, given feedback, and assessed. Featuring coverage on a broad range of topics such as quality management, translation tests, and competency-based assessments, this book is geared towards translators, interpreters, linguists, academicians, translation and interpreting researchers, and students seeking current research on the new ways of evaluating students as well as suggesting criteria for professional quality control in translation e7b5fa8a18

A global range of contributors discuss teaching, evaluation, professionalization and competence as they apply to an array of educational and linguistic situations. This trend is evidenced in the present collection, which addresses issues in pedagogy in a variety of translation and interpreting domains. As a research area, education in the fields of translation and interpreting has received growing attention in recent years, with the increasing professionalization of the language-mediation sector demanding ever more highly trained employees with broader repertoires. Translator and Interpreter Training: Issues, Methods and Debates presents an in-depth consideration of the issues involved in this area of translation and interpreting studies, and will be of interest to all students and academics working and researching in the field e7b5fa8a18

Marc Orlando looks at the gap between practice and research in Translation & Interpreting Studies and at the way this gap could be bridged. He focuses on the way practice and research can inform each other in the education and training of future translators and interpreters, with the aim of training future professionals both as practitioners and researchers in an educational environment that would marry both vocational and academic elements. It is proposed that promoting the

status of practisearchers would help to fill the current gap between practitioners, researchers and Translation & Interpreting educators. Suggestions are made concerning ways of undertaking research and gaining new insights into Translation & Interpreting Studies from professional practice and experience, and of designing new didactic tools for education and training from experiential and theoretical knowledge e7b5fa8a18

This book celebrates Don Kiraly’s scholarly work. The result is a colourful kaleidoscope reflecting the many strands of research questions that Don Kiraly has helped to advance over the past decades. In 20 contributions, colleagues and friends tackle issues closely related to his research interests in translation didactics and translation studies e7b5fa8a18

Trends in E-Tools and Resources for Translators and Interpreters offers a collection of contributions from key players in the field of translation and interpreting that accurately outline some of the most cutting-edge technologies in this field e7b5fa8a18

Each chapter presents a technique, with examples, tasks and exercises. The system, made up of a range of tried and tested techniques, is simple to learn, consistent and efficient. Note-taking for Consecutive Interpreting: A Short Course is the essential step-by-step guide to the skill of note-taking. This user-friendly guide is a particularly valuable resource for student interpreters, professionals looking to refresh their skills, and interpreter trainers looking for innovative ways of approaching note-taking. This second edition has been extensively revised throughout, including: an updated chapter on speech analysis new chapters on comparisons and links revised example speeches and notes a summary of other authors' note-taking guidelines for comparison and reference (Part III) e7b5fa8a18

Electronic Tools for Translators offers complete explanations of a wide range of software products, information resources and online services that translators now need to understand and use. The book can be used as a text in regular classes on computer-assisted translation, in translation practice classes, as well as for self-learning by professionals wishing to update their skills. Individual chapters run through the origins and nature of the internet, the many ways of searching for information, and translation resources on the web, CD-ROMs as information sources, computer-assisted terminology management, the use and construction of corpora, translation memories, localization tools, and the incorporation of machine translation programmes into the translation process. Examples are drawn from English, French, German and Spanish. Austermühl explains all these tools and resources in a clear, step-by-step way, suggesting learning tasks and activities for each chapter and guiding the reader through the jargon e7b5fa8a18

Translator trainers will also find it invaluable when constructing or updating their courses. These include: the history of the technologies, project management, terminology research and corpora, audiovisual translation, website, software and games localisation, and quality assurance. Professional workflows are at the heart of the narrative, and due consideration is also given to the legal and ethical questions arising from the re-use of translation data.
