Aftermath (Rolling Stones album) Christians in the US with its allusion to Jesus walking on water. It is the band's fourth British and sixth American studio album, and closely follows a series of international hit singles that helped bring the Stones newfound wealth and fame rivalling that of their contemporaries the Beatles. The group recorded the album at RCA Studios in California in December 1965 and March 1966, during breaks between their international tours. It was released in the United Kingdom on 15 April 1966 by Decca Records and in the United States in late June by London Records. In response to the lack of creative control, and without another idea for the title, Aftermath is the fourth studio album by the English rock band the Rolling Stones 6432174e50

Avenger2015 has added redundant cast lists to articles with existing character lists, for example here and here. I've explained this to the editor on their talk page at least three times, and have been clear that the articles are intended to be overviews, and that they should not contain incidental characters that are not pertinent to our understanding of the series. User has continued to add ponderous cast lists, without sourcing, without explanation, and without discussion of any sort. They've also added blank cast list sections numerous times including recent ones here and here, and over these four edits (the first few appear to be tests) ([1][2][3][4]) re-added previously removed content. Not sure how to get through to this user since they seem to be editing per their own whims and they refuse to talk. While Apple touts the role of the App Store in creating new jobs in the "app economy" and as of 2023 claims to have paid over \$320 billion to developers, the App Store has also attracted criticism from developers and government regulators that it operates a monopoly and that Apple's 30% cut of revenues from the store is excessive. In October 2021, the Netherlands Authority for Consumers and Markets (ACM) concluded that in-app commissions from Apple's App Store are anti... 6432174e50 Flash displays text, vector graphics, and raster graphics to provide animations, video games, and applications. It is their first album to consist entirely of original compositions, all of which were credited to Mick Jagger and Keith Richards. The band's original leader Brian Jones reemerged as a key contributor and experimented with instruments not usually associated with popular music, including the sitar, Appalachian dulcimer, Japanese koto and marimbas, as well as playing guitar and harmonica. Along with Jones' instrumental textures, the Stones incorporated a wider range of chords and stylistic elements beyond their Chicago... 6432174e50 == About == 6432174e50
