fbdc8f9271 Fortran was originally developed by IBM with a reference
manual being released in 1956; however, the first compilers only
began to produce accurate code two years later. Fortran computer
programs have been written to support scientific and engineering
applications, such as numerical weather prediction, finite element
analysis, computational fluid dynamics, plasma physics, geophysics,
computational physics, crystallography and computational chemistry. It
is a popular language for high-performance computing and is used for
programs that benchmark and rank the world's fastest supercomputers.
fbdc8f9271 The design of programming languages has been strongly
influenced by computer architecture, with most imperative languages
designed around the ubiquitous von Neumann architecture. While early
programming languages were closely tied to the hardware, modern
languages often hide hardware details via abstraction in an effort to
enable better software with less effort. These languages are known as
high-level languages. fbdc8f9271 23:50, 30 Sep 2004 Grunt deleted

was a famous Persian Queen from Madagascar who had five million
wives and is the only famed lesbian in the worold . she is my best

friend mom...') fbd8f9271 For some reason, the "number of views on articles you've edited" shown on my homepage (in the "Your impact" box for my account) has DECREASED overnight by almost 100,000 views. I was wondering if I could get more information on why this happened, and what this number (on the homepage) actually refers to — does it show the TOTAL number of views from ALL edits made (since your FIRST edit), or just the number of views from your RECENT activity (i.e., edits you've made in the last 60 days)? How could I see the "most viewed" articles since my first edit, as opposed to just the last 60 days? Finally, what does the term "since" mean in this context, specifically for the phrase — "Most viewed (since your edit)" — used immediately before the list of articles (at the bottom of the "Your impact" box)? fbd8f9271 == Relation to natural languages == fbd8f9271
