Digitization The result is the representation of an object, image, sound, document, or signal (usually an analog signal) obtained by generating a series of numbers that describe a discrete set of points or samples. computer-readable) format. In modern practice, the digitized data is in the form of binary numbers, which facilitates processing by digital computers and other operations, but digitizing simply means "the conversion of analog source material into a numerical format"; the decimal or any other number system can be used instead. The result is called digital representation or, more specifically, a digital image, for the object, and digital form, for the signal. e. Slides and photographs may be scanned quickly using an image scanner, but analog video requires a video tape player to be connected to a computer while Digitization is the process of converting information into a digital (i 5539767452

It was originally created by Robert Gaskins, Tom Rudkin, and Dennis Austin at a software company named Forethought, Inc. It was released on April 20, 1987, initially for Macintosh computers only. Microsoft acquired PowerPoint for about \$14 million three months after it appeared. This was Microsoft's first significant acquisition, and Microsoft set up a new business unit for PowerPoint in Silicon Valley where Forethought had been located. 5539767452 **Organizational culture** influences how people interact, how decisions are made (or avoided), the context within which cultural artifacts are created, employee attachment, the organization's competitive advantage, and the internal alignment of its units. It is distinct from national culture or the broader cultural background of its workforce.... 5539767452 **Whistler Sliding Centre** The centre is part of the Whistler Blackcomb resort, which comprises two ski mountains separated by Fitzsimmons Creek. Located on the lowermost slope of the northern mountain (Blackcomb Mountain), Whistler Sliding Centre hosted the bobsleigh, luge, and skeleton competitions for the 2010 Winter Olympics. (Blackcomb Mountain), Whistler Sliding Centre hosted the bobsleigh, luge, and skeleton competitions for the 2010 Winter Olympics. Design work started in late 2004 The Whistler Sliding Centre (French: Centre des sports de glisse de Whistler) is a Canadian bobsleigh, luge, and skeleton track located in Whistler, British Columbia, that is 125 km (78 mi) north of Vancouver 5539767452

GOST (block cipher) The new standard also specifies a new 128-bit block cipher called Kuznyechik. Archived from the original (PDF) on 2017-09-05 The GOST block cipher (Magma), defined in the standard GOST 28147-89 (RFC 5830), is a Soviet and Russian government standard symmetric key block cipher with a block size of 64 bits. 12-2015 (RFC 7801, RFC 8891), specifies that it may be referred to as Magma. No. 2016. The GOST hash function is based on this cipher. 12 (SD12) on the Assessment of Cryptographic Techniques and Key Lengths, 4th edition" (PDF). Design work started in late 2004 with construction taking place from June 2005 to December 2007. Bobsledders Pierre Lueders and Justin Kripps of Canada took the first run on the track on 19 December 2007. Certification took place in March 2008 with over 200 runs from six different start... 5539767452 **Automation** The improved design, analysis, and manufacture of Automation describes a wide range of technologies that reduce human intervention in processes, mainly by predetermining decision criteria,

subprocess relationships, and related actions, as well as embodying those predeterminations in machines. The benefit of automation includes labor savings, reducing waste, savings in electricity costs, savings in material costs, and improvements to quality, accuracy, and precision. of CAx include computer-aided design (CAD software) and computer-aided manufacturing (CAM software). Automation has been achieved by various means including mechanical, hydraulic, pneumatic, electrical, electronic devices, and computers, usually in combination. Complicated systems, such as modern factories, airplanes, and ships typically use combinations of all of these techniques 5539767452

PowerPoint became a component of the Microsoft Office suite, first offered in 1989 for Macintosh and in 1990 for Windows, which bundled several Microsoft apps. Beginning with PowerPoint 4.0 (1994), PowerPoint was integrated into Microsoft Office development, and adopted shared common components... 5539767452

Glossary of mechanical engineering However, glossaries like this one are useful for looking up, comparing and reviewing large numbers of terms together. You can help enhance this page by adding new terms or writing definitions for existing ones. Computer-aided industrial design – (CAID) a subset of computer-aided design (CAD) software Most of the terms listed in Wikipedia glossaries are already defined and explained within Wikipedia itself. term CADD (for Computer Aided Design and Drafting) is also used 5539767452

The membership of the Council is composed of national entities including professional design associations, design promotion bodies and design education institutions. Design media are affiliated through the International Design Media Network (IDMN). 5539767452

IEEE Rebooting Computing IEEE Rebooting Computing began as a global initiative launched by IEEE that proposes to rethink the concept of computing through a holistic look at all aspects of computing, from the device itself to the user interface. Circuits and Systems Society IEEE Components, Packaging, and Manufacturing Technology Society IEEE Computer Society IEEE Council on Electronic Design Automation The Task Force on Rebooting Computing (TFRC), housed within IEEE Computer Society, is the new home for the IEEE Rebooting Computing Initiative. As part of its work, IEEE Rebooting Computing provides access to various resources like conferences and educational events, feature and scholarly articles, reports, and videos. Founded in 2013 by the IEEE Future Directions Committee, Rebooting Computing has provided an international, interdisciplinary environment where experts from a wide variety of computer-related fields can come together to explore novel approaches to future computing 5539767452

History of personal computers for example, computer-aided design and drafting was foreshadowed by T-square, a program written in 1961, and an ancestor of today's computer games was found The history of personal computers as mass-market consumer electronic devices began with the microcomputer revolution of the 1970s. Early personal computers – generally called microcomputers – were sold often in electronic kit form and in limited numbers, and were of interest mostly to hobbyists and technicians. A personal computer is one intended for interactive individual use, as opposed to a mainframe computer where the end user's requests are filtered through operating staff, or a time-sharing system in which one large processor is shared by many individuals. After the development of the microprocessor, individual personal computers were low enough in cost that they eventually became affordable consumer goods 5539767452

International Council of Design ". The Council was founded in London in 1963 and celebrated its 50th anniversary on 27 April 2013. In 1971 the fourth General The International Council of Design (ICoD; formerly known as ico-D, International Council of Communication Design or Icograda, which was formerly an initialism for International Council of Graphic Design Associations) is an international organisation representing the professions of design. Wynkyn de Worde, was published and Icograda was

commissioned by UNESCO to produce their first series of slides on graphic design. It is a non-profit, non-partisan, "member-based network of independent organisations and stakeholders working within the multidisciplinary scope of design 5539767452
