

Additional Exercises Convex Optimization

Solution Boyd

Objective: Elected functional combination of variables (to be maximized or minimized)

Feasibility: Values for set of variables that satisfies all constraints and minimizes/maximizes Objective.

Design optimization If the design optimization problem has more than one mathematical solutions the methods of global optimization are used to identified the Design optimization is an engineering design methodology using a mathematical formulation of a design problem to support selection of the optimal design among many alternatives. optimization one. Design optimization involves the following stages:

Variables: Describe the design alternatives Constraints: Combination of Variables expressed as equalities or inequalities that must be satisfied for any acceptable design alternative
