== Tooth gingival interface == 158b8fc02a The Baltimore based band was firstly dubbed the Pockets by singer Luther Ingram as a description of their musical style. As a septet the band went on to record several demos at Sheffield Studios in 1975. Being mostly top 40 covers and four original songs these records didn't make much of an impact. With this being so band member Al McKinney eventually met up with John Mackey of the Baltimore Colts. Mackey happened to be Verdine White's next-door neighbor and thus a cassette of the group was passed along to White who became impressed. White went on to bring in Larry Jacobs from San Francisco to be the group's lead vocalist. As an eight-man band the Pockets got signed in 1977 to Columbia Records. The group then started recording their first album which was being produced by White. 158b8fc02a == Deep pocket as a slang term == 158b8fc02a The play is a tragicomedy about a small rural town in Ireland where many of the townspeople are extras in a Hollywood film. The story centres on Charlie Conlon and Jake Quinn, who, like much of the town, are employed as extras for the filming. The key point in the play is when a local teenager commits suicide, by drowning himself with stones in his pockets, after he is humiliated by one of the film stars. The script calls upon the cast of two to perform all 15 characters (men and women), often switching gender and voice swiftly and with minimal costume change – a hat here, a jacket there. Comedy also derives from the efforts of the production crew to create the proper "Irish feel" – a romanticised ideal that often conflicts with the reality of daily life. 158b8fc02a The play was first shown in Belfast in 1996 and went on to The Edinburgh Festival fringe and to have a successful run in London's West End. The original cast of Conleth Hill and Sean Campion later took the show to Broadway. Having won the Irish Times/ESB Irish Theatre Award for Best Production in 1999, the play... 158b8fc02a == Early life

== Origins == 158b8fc02a According to the sanctuary, Pockets was born on April 1, 1992, and lived his early life as a pet in British Columbia. In 2009, Pockets' owner was finding herself challenged to look after him, and searched for a place that could take him. On finding Story Book Farm, she flew with Pockets to Ontario, and stayed with Pockets for a week to get him comfortable in his new home. The former owner still later kept in touch with the sanctuary. 158b8fc02a The interface between a tooth and the surrounding gingival tissue is a dynamic structure. The gingival tissue forms a crevice surrounding the tooth, similar to a miniature, fluid-filled moat, wherein food debris, endogenous and exogenous cells, and chemicals float. The depth of this crevice, known as a sulcus, is in a constant state of flux due to microbial invasion and subsequent immune response. Located at the depth of the sulcus is the epithelial attachment, consisting of approximately 1 mm of junctional epithelium and another 1 mm of gingival fiber attachment, comprising the 2 mm of biologic width naturally found in the oral cavity. The sulcus is literally the area of separation between the surrounding epithelium and the surface of the encompassed tooth. 158b8fc02a
