

Oracle Banking Digital Experience Release Notes

Database other organizational data; in business to record presentation notes, project research and notes, and contact information; in schools as flash cards or other In computing, a database is an organized collection of data or a type of data store based on the use of a database management system (DBMS), the software that interacts with end users, applications, and the database itself to capture and analyze the data. The sum total of the database, the DBMS and the associated applications can be referred to as a database system. Often the term "database" is also used loosely to refer to any of the DBMS, the database system or an application associated with the database. The DBMS additionally encompasses the core facilities provided to administer the database 10cfa3dafe
